

UTOPIA CAD PROGRAMS UPDATED

Utopia Bathroom Group Ltd is pleased to announce that the entire, recently expanded product range is now live on the Planit Fusion and Logicom Virtual Worlds programs.

Commenting on the update, Helen Bray, Marketing Manager at Utopia, said, "These two programs are an invaluable sales tool for our retailers, many of whom already take advantage of the speed and accuracy which they offer. The simplicity of both software programs allows even novice computer users to instantly become a budding interior designer. Everyone subscribing to the programs should have received an updated catalogue by now. If not, Planit subscribers should contact Planit direct and Logicom users should contact our Marketing Department on 01902 406400."

The Utopia product portfolio was significantly enhanced and extended at KBB 2008 in March. In addition to major new product launches in fitted and modular furniture and sanitaryware, the company also diversified into baths and shower enclosures.
