

Care and Maintenance Guide

Bath Screens

Bath Screens

All Utopia bath screens feature Clearshield technology which provides a water-repellent coating. Designed to keep the glass looking pristine, Clearshield reduces water spots from limescale and mineral deposits.

By repelling the water, the screen stays cleaner for longer which reduces the growth of bacteria and mould. All bath screens are supplied with a five year guarantee against manufacturing defects. All screens feature 8mm toughened glass.*

Bath screens can be susceptible to damage during installation and any product faults must be reported prior to installation.

*Symmetry curved screen is 6mm.

Cleaning

With care and attention you can keep your bath screen looking like new. We strongly recommend that the glass and the framework are wiped down after every use with a squeegee and dried with a soft cloth. To

clean, use warm soapy water and a clean cloth and rinse off.

TOP TIPS

- Always remove any water remaining on the glass, frame and fittings.
- Do not allow limescale to build up on the screen.
- Do not leave neat cleaning products on the surfaces.
- Do not use any "spray on and leave" cleaning products.
- Ensure cleaners are non-abrasive.
- Do not use any cleaning products containing bleach, scouring powders, solvents or other aggressive cleaning agents.
- To remove limescale a solution of 50:50 white vinegar and water can be used.
- Ensure vinegar solution is rinsed thoroughly and polished off with a dry cloth.

DO NOT apply weight or pressure to the bathscreen.

DO NOT swing the bathscreen violently.
