

Application

If it is required to use the touch-up paint, ensure that the surface is dry and clean and free from dust or oils.

Stir the paint thoroughly before use and apply with a slightly damp sponge, premium quality brush or roller. Thinning is not recommended. If using a sponge to apply the paint, carefully dap onto the required area and leave it to dry.

Multiple coats may be required to build-up the paint to give the required finish.

Cautions

Water based paint. Keep away from frost and apply at temperatures between 10 – 30° C. Ensure good ventilation during application and drying. Keep out of reach of children. Avoid contact with skin and eyes. Wear a mask if sanding. Please dispose of any unused paint responsibly.
